

ICC North Texas Chapter 2009 September Training

Swimming Pools

This seminar provides basic information needed to enforce the 2008 NEC requirements for swimming pools located in article 680. Topics covered will provide an overview of typical swimming pool inspections.

- Steel & Ground
- Deck Steel
- Underground Electrical
- Final Pool

Wiring in Medical Offices and Hospitals

This seminar provides basic information needed to enforce the 2008 NEC requirements for health care facilities located in article 517. Topics covered will provide an overview of typical electrical inspections made in health care facilities such as doctor's offices, and dentist's offices and hospitals.

- Wall rough in inspections and enhanced grounding requirements
- Ceiling Inspections and the essential electrical system
- Final Inspections and performance testing

Speaker: **Bill McGovern:**

- Bill is the Electrical Inspections Supervisor for the City of Plano and has over 18 years experience teaching the National Electrical Code. He represents the International Association of Electrical Inspectors on Code Making Panel -2 for the 2008 & 2011 editions of the NEC, serves as chairman of the ICC Electrical Exam Development Committee and is a committee member on the NECA National Electrical Installation Standard (NEIS).
